THE POWERFUL LIQUID FEED SUPPLEMENT FOR MUSCLE GROWTH AND DEVELOPMENT ...

Skeletal muscles are one of the most important components in the horse's body. Power, stamina, flexibility and motor control play a major role in maximizing performance and health.

Intensive training, hard work and recovery from illness are some of the conditions which lead to a decrease in performance and lacking vitality. Consequently adjusting nutrition and training accordingly can help maximize your horse's potential.

Orysanol E is a daily nutritional supplement suitable for young horses, sport/race horses, stallions and brood mares. It is a unique high concentrated formula, designed to promote effective maximum muscle development and to support muscle metabolism.

ORYSANOL E CONTAINS

- **Gamma-oryzanol (10 %)**
as a naturally occurring sterol sourced from rice bran to enhance natural, healthy muscle formation
- **Vitamin E (115,000 mg/kg)**
as an antioxidant stimulant for muscle metabolism
- **L-carnitine (10,000 mg/kg)**
as a naturally occurring amino acid for stamina support

ORYSANOL E IS BENEFICIAL FOR

- Enhancing and maintaining an optimum muscle metabolism, strength and integrity
- Horses in training
- Horses at time of peak activity
- Stallions during intensive covering periods
- Preparation for sales and license tests
- Recovery after injuries and illnesses

QUALITY

- High manufacturing German standard
- High concentration of natural gamma-oryzanol
- Natural anabolic effect due to the high concentration of gamma-oryzanol

POWER

- May promote a fast and effective increase in muscle strength
- Helps to improve muscle definition, top line and flexibility

STAMINA

- Stamina is the increased exercise capacity for high performance over a longer period of time
- Supplemented horses may show better balance and increased freedom of movement

VITALITY

- Helps to improve overall body condition
- Boosts musculature function and prevents muscle soreness
- Helps to reduce the stress and strains of training
- Supports an improved coat quality and colour

ORYSANOL E – ONE PRODUCT, MANY BENEFITS

"We use Orysanol E very successfully to enhance muscle formation and increase vitality, in particular for sport horses. Moreover it is very suitable as a supplement for the training of young horses and in periods of convalescence and recovery. The high concentration of gamma-oryzanol causes a natural anabolic effect and an optimized stimulation of musculature."

(Official FEI-Vet. Augusto Fernandez, Warendorf, Germany)
